

PROFESSIONAL SUMMARY

AI application developer with 2+ years at Oracle shipping production **RAG and agentic AI** workflows across Fusion SCM/SCP. Winner, **Oracle Gen AI Hackathon** (1st of 33 teams); selected for **Google Summer of Code 2026** on Kubeflow (CNCF). Built on **LangChain, LangGraph**, vector databases, and **Kubernetes-native** serving (KServe).

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, SQL
AI / ML: LangChain, LangGraph, RAG, MCP, Kagent, agent evals, Ollama, TEI embeddings, FAISS, ChromaDB, Milvus, Flowise, PandasAI
Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, Java ADF, Postman, Prisma
Frontend: React, Next.js, Tailwind CSS, ShadCN, ReactFlow
Cloud / DevOps: Docker, Kubernetes, OCI, OKE, KServe, Kubeflow Pipelines, GitHub Actions, CI/CD
Databases: PostgreSQL, MySQL, Elasticsearch, Supabase, Firebase

EXPERIENCE

AI Application Developer

Jun 2024 - Present

Oracle

Bengaluru, India

- Built **RAG and agentic AI** integrations for **Oracle Fusion SCM Cloud** across 3 customer-facing workflows (catalog lookup, order review, planner assistance) using **LangChain, LangGraph, embeddings, and vector databases**.
- Built an **MPN part-matching pipeline** (fuzzy matching, semantic retrieval, clustering, web-search fallback) that lifted match coverage **~30%**.
- Shipped an **order-classification agent** with rule guardrails and human-review handoff, processing **10K+ order lines/run**.
- Built **RAG planner-assist flows** over SCP exceptions/notes, cutting repeated manual investigation **~40%** via source-grounded answers.

Open Source Maintainer - Kubeflow

May 2026 - Present

Google Summer of Code 2026

Remote

- Selected for **GSoC 2026** to expand kubeflow/docs-agent into an **Agentic RAG** reference architecture, cutting multi-page Kubeflow troubleshooting lookup from **minutes to seconds**.
- Built **multi-index retrieval** across GitHub issues, source code, and 1K+ Markdown docs into **10K+ searchable chunks** with path/product-area metadata.
- Shipped **50+ CI-backed retrieval tests** and **KServe** deployment patterns on OCI/OKE for repeatable cloud-native serving.

Application Developer Intern

May 2023 - Jul 2023

Oracle

Hyderabad, India

- Built **Copy Data** functionality for lead-time columns in Oracle SCM, optimizing retrieval/update workflows with **Elasticsearch** and **PATCH-based** API updates.
- Added **Linear Regression** trend analysis to Oracle JET charts for supply-chain forecasting.

PROJECTS

MacBatch - Distributed Batch Inference on Idle Apple Silicon

2026

Python, FastAPI, TypeScript, Ollama, Apple Silicon, npm CLI

Product Source

- Built an open-source **batch inference platform** that distributes latency-tolerant AI jobs—**embeddings, OCR, and classification**—across a pool of idle Apple Silicon machines running open models locally through **Ollama**.
- Designed a **FastAPI** control plane modeling jobs → shards → tasks, with **600s worker leases**, automatic reclaim and reassignment on failure, and pull-based workers that join behind NAT over outbound HTTPS only.
- Benchmarked **252,686 embedding items/hour** on a single node and a **2.8×** throughput gain from shard batching alone, publishing a **cost model against GPU rental** with reproducible methodology.

CrackRound - Agentic AI Mock-Interview Platform

2025

Next.js, TypeScript, OpenAI GPT-4o, Prisma, PostgreSQL, WebSockets, Sarvam API

Website

- Built an end-to-end **agentic AI interviewer** from scratch to production with **5 streaming personas** across system-design, conceptual, and behavioral rounds, plus **LLM-vs-LLM simulation** that builds a candidate persona from a resume and self-plays full interviews.
- Engineered a real-time voice loop with streaming STT → GPT-4o → streamed TTS over WebSocket at **~1.5s response latency**.
- Integrated a live DSA code judge and system-design whiteboard into the LLM context, then productionized scoring with JSON-schema evaluation, **5-dimension feedback**, auth, credits, and **\$2/session** cost guardrails.

EDUCATION

Bachelor of Technology in Mechanical Engineering

2020 - 2024

National Institute of Technology, Warangal

CGPA: 7.34

ACHIEVEMENTS

- Accepted for **Google Summer of Code 2026** under Kubeflow for an Agentic RAG project; speaker at **Kubeflow Community Showcase 2026**.
- Won **Oracle Gen AI Hackathon: 1st among 33 teams**, top **5 among 300+ employees**; Runner-up, **Tri-NIT Hackathon 2024**, Backend Developer track.
- Solved **600+ coding problems** across LeetCode, GeeksforGeeks, CodeChef, and Codeforces; conducted **15+ competitive programming contests**.
